

ECAS- ENHANCED CAMPUS AUTOMATION SYSTEM is a premium software solution for the automation needs of educational institutes. ECAS came into the existence through a long and intensive study into the working system of several educational institutes of different types from all over the country clubbed with our extensive experience in the field of software development, hard work of our software analysts and developers.

eCAS An ERP for Schools Coachings Colleges & Universities

The strength of ECAS is its never ending development process which keeps all the software development, web development and research & development teams on their toes to deliver refined products backed by latest technological inputs. A constant endeavour from both our software development and analysis teams is the reason for tremendous success of this software that it is relied upon by more than 350 institutes across India which include coaching classes for competitive exams, schools, engineering colleges and other professional education institutes.

The entire application is divided into several modules which the client adopt as per his choice and convenience. Accordingly, the pricing of the software is also modular based the modules selected by you thus eliminating the excess load of any wasteful cost included in your package.

Regular modules like **Student Management System, Fees Management System, Result Processing Module, Time-Table and Course Monitoring modules** of ECAS are also very elaborate and distinctly organized. The expanded features and details of all the modules of ECAS can be seen in the following text.

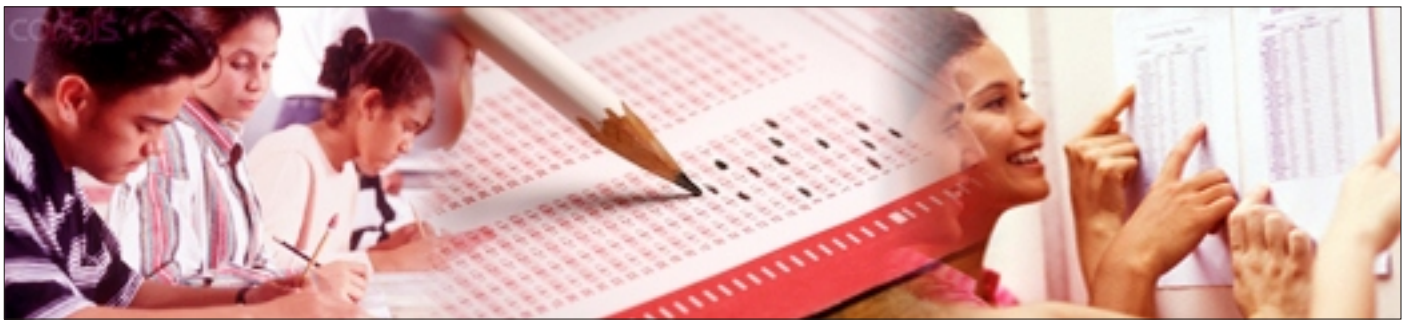

Besides regular modules, ECAS comes with a complete family of seamlessly integrated softwares. Supporting softwares like **OMR Form Processor, OMR Answer Sheet Checker, Objective Question Paper Generator, Library Management System, Payroll Management System, SMS Sender** etc. can be used separately as standalone applications or in synchronization with each other to give a complete integrated solution to your various needs.

ECAS also has a set of web compatible integrated modules like **Online Result Display, Online Objective Test, Online Admission, Online Alumni Registration, Online Conference Management** etc.

SOME GENERAL FEATURES

- Client end customizable. Same installation can support various course and fee structures; Creation of Courses as per varied systems (yearly/semester/integrated) with respective intake & durations. Can operate on multiple academic/financial years simultaneously.
- User friendly and efficient data input panels with checks for duplicity based on various field combinations at the time of data entry.
- Very elaborate reports with thousands of filter and presentation combinations. Reports layouts are client end customizable.
- Very secure with multi-tier access. Limited access for each user to specific panels and even to specific functions on a given panel. Each entry in the financial/marks/master database bears the signature of the operator.
- Works well on wired & wireless networks (LAN and Wi-Fi) with no need of a specific server node architecture. Optimizes work effort through small utilities like direct webcam photocapture, SMS from self Mobile & PC, general voice announcements, Touch screen data fetching.
- Compatible with various ACS like Fingerprint Reader, Smart Card etc. (Customised integration).

Serving **350+** Institutes

LIST OF MODULES AND THEIR FEATURES

1. STUDENT MANAGEMENT SYSTEM

- **Basic Student Management** (Quick registration; Instant Photo & Barcoded Identity Card, Complete Infosheet generation; Elaborate and efficient search of group/individual based on parameters like name, surname, ID, father's name, address and other filters based on one or more criteria; Bulk handling of students and Transfer/Promotion to other class; Touch screen panel for parents & students)
